LED Handheld Remote Controller

DESCRIPTION

The Wireless RGB CCT Multi Zone Handheld Remote Controller gives you simple, flexible control over RGB and color tuning LED lighting systems. Designed for ease of use and powerful functionality, this remote allows you to adjust color, brightness, and white temperature to create the perfect lighting for any environment. With complete RGB CCT control, the remote manages both RGB colors and dual white channels with precise 5 channel performance. The four zone capability allows you to control up to four lighting zones independently or synchronize them together for coordinated lighting across a space.

The system is also expandable and scalable, allowing each zone to be paired with unlimited receivers or amplifiers and supporting up to eight remotes connected to the base controller[AB1]. Its intuitive interface makes adjusting brightness, color, and color temperature quick and effortless, giving you full control of your lighting at the touch of a button. [AB1]Link to base controller
