

RGB+W LED DRIVER SIGNAL AMPLIFIER/REPEATER

MODEL: AL-CTLR-RPT4

Description

aspectLED's LED driver signal amplifier/repeater allows you to overcome the standard 5A/channel limit of most DMX->RGBW Decoder/Drivers by placing these amplifiers/repeaters in series. Simply connect one or more of these amplifier/repeaters to the output RGBW terminals on and DMX decoder/driver or other LED control device with RGBW outputs. You can use a virtually unlimited number of fixtures with one DMX decoder or RGBW signal with these repeaters.

This AL-CTLR-RPT4 amplifier/repeater is compatible with all of aspectLED's RGBW and RGBA LED fixtures.
