DMX STAND-ALONE PC/MAC PROGRAMMABLE CONTROLLER (WITH WIFI)

MODEL: AL-CTRL-DMXPCMAC-WIFI

Description

This stand-alone DMX controller allows you to control your DMX fixtures via any PC or Mac. When you're not programming it, the fixture operates in stand-alone mode, allowing users to switch between up to 10 of your pre-programmed scenes. The stand-alone controller does not require a PC to be connected to it during normal operation!

This controller has all the same features as our AL-CTLR-PCMAC but also can be connected to via WIFI. We recommend using our DMX to RJ45 Adapter Cable to connect to your computer for programming. This upgraded version of our DMX stand-alone controller allows you to control your DMX zones via your smartphone.

RoHS Compliant   1YR WARRANTY
