DMX STAND-ALONE PC/MAC PROGRAMMABLE CONTROLLER

MODEL: AL-CTRL-DMXPCMAC

Description

This stand-alone DMX controller allows you to program your DMX fixtures via any PC or Mac. When you're not programming it, the fixture operates in stand-alone mode, allowing users to switch between up to 10 of your pre-programmed scenes. The stand-alone controller does not require a PC to be connected to it during normal operation!

We recommend using our DMX to RJ45 Adapter Cable to connect to your computer for programming.

RoHS Compliant

1YR WARRANTY
