

Summit LED Strip Light - RGB, 32ft

AL-SL-DL-CC-IP20-24-RGB-32

32ft Color-Changing Long Max Run Strip Light

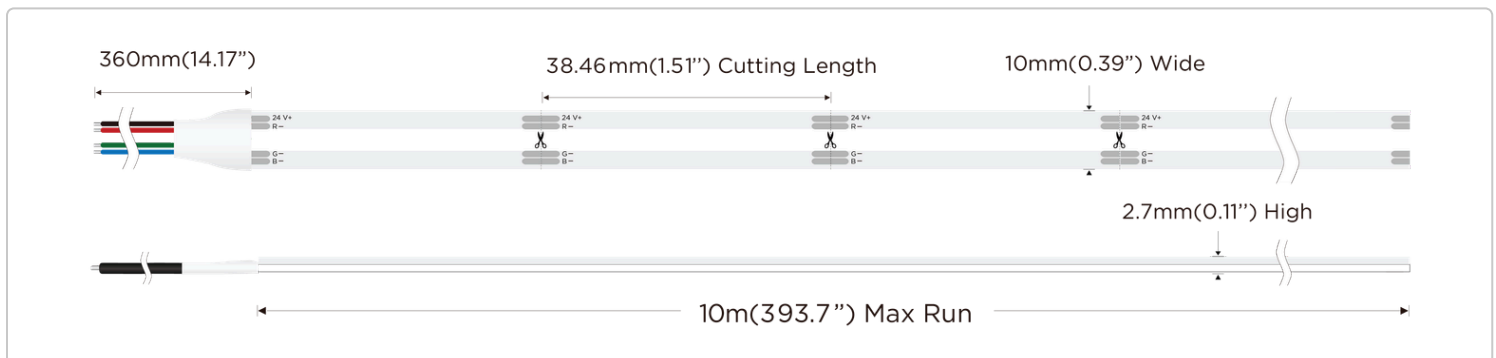

DESCRIPTION

The RGB color-changing Summit Strip Lights are the ultimate choice for colorful, seamless accent lighting. Summit creates a clean, continuous line of light featuring no visible diodes and no diffusion lens required. Advanced CSP technology delivers smooth, even illumination while improving efficiency and long-term reliability. Integrated Chip (IC) technology enables continuous runs up to 32 feet without voltage drop, reducing time, labor, and materials compared to traditional constant voltage strips.

Constant current technology allows each cut section to regulate its own current, ensuring uniform brightness and even light distribution across the entire strip for vibrant RGB color-changing performance from end to end. Compatibility includes non-dimmable power supplies and DC decoders/remotes, making installation and upgrades quick and hassle-free.
