

# Summit LED Strip Light - Static White, 32ft, Waterproof AL-SL-DL-CC-IP68-24-32

Static White, Waterproof, Long Max. Run

## DESCRIPTION

Waterproof Single Color Summit Strip Lights are designed for seamless outdoor accent lighting. Using advanced CSP technology, they produce a clean, continuous line of light with no visible diodes and no diffusion lens required, delivering smooth and even illumination. Integrated IC technology allows for continuous runs up to 32 feet without voltage drop, reducing installation time, labor, and materials compared to traditional constant voltage strip lights.

Each cut section regulates its own current to maintain consistent brightness from end to end. Featuring a 90+ CRI, these strip lights provide accurate color rendering and vibrant illumination. Available in four color temperatures, Summit Strip Lights provide a tailored lighting solution for a wide range of applications. With an IP68 waterproof rating, they are fully submersible and built to perform in demanding environments. Compatible with non-dimmable power supplies and DC decoders/remotes, installation and upgrades are simple and reliable.
