

# 24" LED UNDER CABINET LOW PROFILE LIGHT BAR

Dimmable Low Voltage

MODEL: AL-LB-LP-24IN

## Description

Our Ultra Bright lightbars come with mounting clips that make installation as easy as snapping them into place and connecting them to power. These fixtures have an extremely low profile design, keeping them out of the way and hidden. Their 24VDC input voltage means smaller low voltage wire, which is easy to work with and hide, and their frosted lens diffuses the light output, preventing hotspots or pools of light from appearing on glossy countertops.

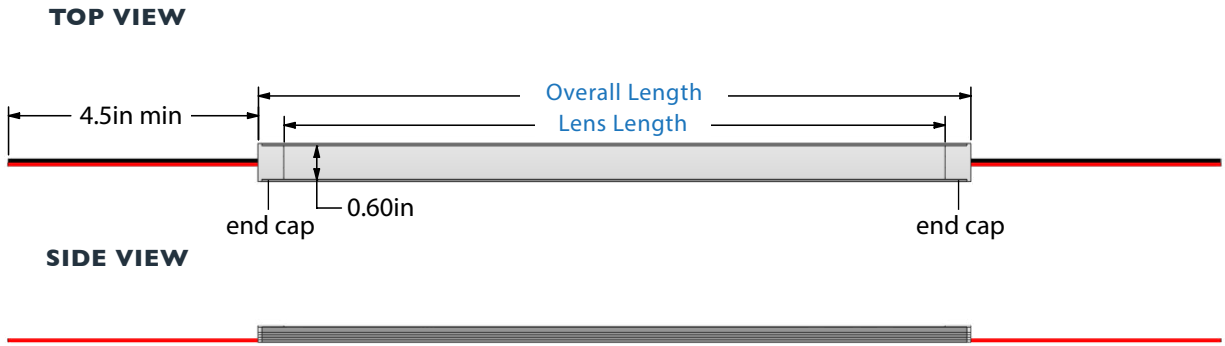

These light bars require a power supply to convert your 120VAC line voltage down to 24VDC. *Contact us for details on versions with customized connectors, or custom lengths.*
