

Smart Home Control Panel

ADQUIO Wall Screen 8"

IMPORTANT SAFETY INSTRUCTIONS

READ ALL INSTRUCTIONS BEFORE INSTALLING FIXTURES. SAVE THESE INSTRUCTIONS.

Operating Temperature:

32°F to 104°F (0°C to 40°C)
Not suitable for damp locations.
For indoor installation only.

Safety:

For your safety, this device must be wired in accordance to local electrical codes and ordinances. All work should be done by a qualified electrician.

Failure to install and wire device in accordance with the National Electrical Codes (NEC), all applicable Federal, State, and Local electrical codes, as well as specific UL safety standards for the intended working environment (location/application), may cause serious personal injury or property damage. Knowledge and expertise of electrical systems is required for installing aspectLED Smart Home Panels. When in doubt, contact a certified electrician.

If you have any questions during your installation, please feel free to contact our Customer Support team at support@aspectled.com or give us a call at 888.503.1317

Note: This Smart Home Control Panel *must* be installed onto a wall surface.

Casambi Controller
**sold separately*

AL-CTLR-ADQ-RMT-8-HW
Smart Home Control Panel

**Not Included with Purchase*
1-Gang Electrical Switch & Outlet Box

Power

Ensure that the necessary wiring is in place at the installation location for the wall-mounted tablet. For optimal reliability, a wired network connection with Power Over Ethernet (PoE) is recommended, particularly for new constructions with pre-installed network cables.

It can also be powered using a 12VDC power supply installed in the junction box closest to the screen. If you're unsure how to handle the wiring, it's best to consult a licensed electrician to handle this part of the installation.

Casambi Setup

The panel uses Bluetooth to control your Casambi network. Make sure your Casambi system is fully set up. For detailed guidance on installing Casambi with your lighting, visit the respective product page on our website and refer to the installation guide located under the Technical Documents section of the description.

INSTALLATION INSTRUCTIONS

1 Select Your Screen Location

Using your phone app as a guide, choose a location for the device that is within the Bluetooth range of your Casambi controllers/system.

2 Select Screen Orientation

Choose a vertical or horizontal screen orientation.

3 Preparing the Electrical Box

- Use a stud finder to locate a stud in the wall.
- Cut a hole to fit a standard 1-Gang Electrical box.
Note: For a vertical screen installation, the junction box must be installed horizontally.

4 Attaching the Screen Support Bracket

Attach the screen support bracket to the junction box with the included screws, ensuring a distance of 81.5mm between horizontal screws.

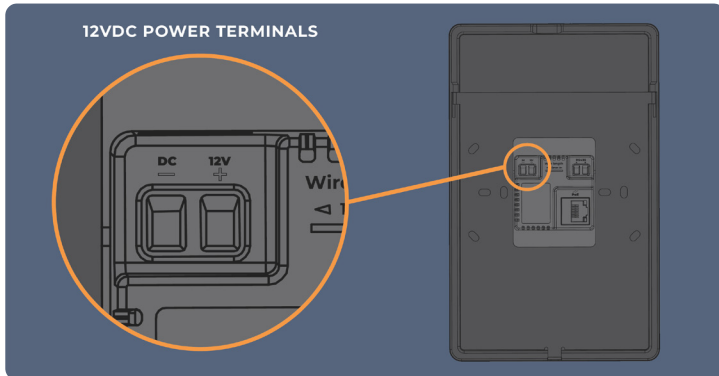

INSTALLATION INSTRUCTIONS

(Continued From Front)

5 Connect to Power

Connect the tablet to the 12VDC power supply. If using PoE, connect the network cable directly to the Ethernet port.

6 Installing the Device

Once connected to power, insert the screen and tighten the lower screw.

Use included screw to secure tablet into metal bracket.

7 Configuring Security

Once the Smart Home Control Panel is connected to power, set a security PIN for your device to protect your settings.

- Press the Home Button and swipe up.
- Navigate to Settings > Select Security
- Then tap on Screen Lock Options and choose your preferred security type

8 Remote Support Setup

For remote support and servicing, use AnyDesk. For first time setup you will need to reset your password within AnyDesk. To complete this follow these steps:

- Open the AnyDesk app
- Navigate to Settings > Security > Permission Profiles > Unattended Access
- Click the key icon and reset your password

9 Syncing with Casambi

Open the pre-loaded Casambi app on the panel and sync it with your Casambi-connected LED light fixtures for seamless control. The Casambi app might need to be updated in the Google Play Store.

10 That's it, you're all set!

Nice work!

Once the device is securely installed and setup on your wall, your lighting system is ready to use.

Share Your Work!
