

Casambi App Set Up

INCLUDED IN THIS GUIDE

SECTION 1 | Casambi App Set Up

- SECTION 1.1 | App Installation & Device Set Up
- SECTION 1.2 | Controlling Your Lighting
- SECTION 1.3 | Creating Scenes
- SECTION 1.4 | Creating Animations

THINGS YOU'LL NEED FOR INSTALLATION

Smart Phone or Tablet

Accessory Controller
*optional

Prefer to follow our online instructions?

APP INSTALLATION & DEVICE SET UP

1 Wire Your Casambi to Your Power Supply and Fixtures

Before you begin, make sure your power supplies and light fixtures are connected and installed properly. Need help making your connections? Scan the QR code to view our installation guides.

2 Download the Casambi App onto Your Smartphone or Tablet

Casambi App Icon

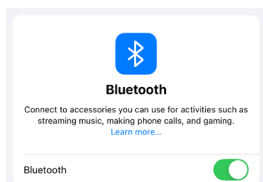

App Store

Google Play

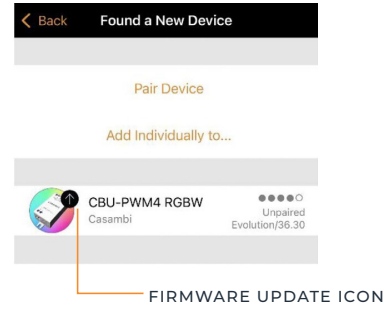

3 Connect the Power Supply to Power

4 Ensure Bluetooth is Activated on Your Device

5 Open the Casambi App

The app will automatically discover all luminaires and dimmers that are powered through Bluetooth connection.

6 Selecting Your Casambi Profile

By default, your Casambi will usually show up as the standard RGBW profile. If you would like to change this to a different profile (such as Single Color or Color Tuning), tap the Casambi you'd like to change, select **Change Profile**, then select the type of lighting you'd like to control.

7 Update Firmware if Prompted

If you see a small arrow on the top of your Casambi's icon, a firmware update is available for the device. To update, tap the Casambi icon and select **Update Firmware**. Then, follow the instructions on screen to complete the update.

8 Pairing Your Device

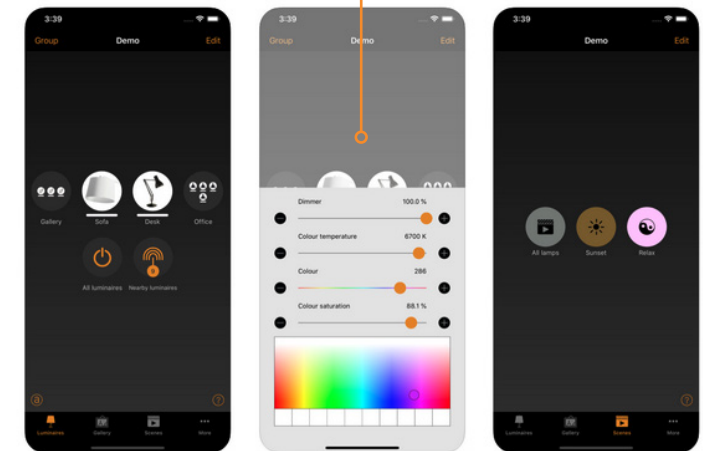

To onboard a device into your basic network, select **Pair Device**. To customize your network options select **Add Individually To > Create a Network > Evolution**

CONTROLLING YOUR LIGHTING

9 Basic Lighting Control

The main screen that will control your lighting is the Luminaires Tab. Tap & hold on the fixture control to bring up screen controls for the following basic lighting gestures:

- Power On & Power Off
- Adjust Brightness with the Dimming Slider
- Adjust Color Tuning with the Color Temperature Slider
- Adjust Fixture Color

Continue to installation instructions on next side. →

CONTROLLING YOUR LIGHTING

(Continued)

Naming Your Device

To customize the name of your device, go to **My Network > Edit > Tap the Fixture You'd Like to Change > Name** and rename your device. You can also set the icon image for your device from this panel.

PRO TIP!

From this panel you can also adjust the high-end and low-end trim if you're experiencing flicker issues. If these issues persist after attempted adjustment, you may need to evaluate your wiring setup.

Grouping Your Fixtures

If you have multiple Casambi Devices, you can group them together for simultaneous control. To do this, select **Group** from the upper left corner, tap on the fixtures you want to group together, then select the folder icon from the upper right corner to assign a name and create the group.

Creating a Gallery

You can also use the Gallery tab to control your lighting. From this tab, you can create a picture gallery of multiple rooms and scenes controlled by your Casambi system and label the pictures with markers denoting where your Casambi controlled lights are located.

To Create a Gallery:

- Tap the Gallery tab then select the sample photo
- Select **Take Photo with Camera** or **Upload Photo From Device**
- Change the default name to your preferred option
- Tap the + in the upper left corner then tap the fixtures you want included in this gallery. Tap **Done** when finished.
- A colored dot will appear on the screen that you can adjust to signify where your fixture is located in the photo.
- Repeat the process for any other lights that you'd like to label.

CREATING SCENES

To Create a Scene

- Navigate to the **Scenes** tab located on the bottom menu of the main screen > **Add a Scene > Enter a Name > Add Scene**
- Tap the icons of the fixtures you want to add to the scene
- Tap and hold on the fixture control to open the slider and palette screen, then select the color and dimming settings you'd like for the fixture. Select **Continue** when done.
- Set the color, icon, and name for your scene and select **Done** when completed.
- Repeat the process to create as many Scenes as you'd like

CREATING ANIMATIONS

To Create an Animation

Go to **Edit > + > Create a Name for Your Animation > Add an Animation >** Then add in the animation steps and transitions you'd like to make.

For Example:

- Add "Example Scene 1" - Fade Time 10 sec.
- Add 1 Minute Wait Time
- Add "Example Scene 2" - Fade Time 10 sec.

This will fade into Example Scene 1 for 10 seconds, stay there for 1 minute, and then fade to Example Scene 2 for 10 seconds.

After adding in any animations that you want, select if you want the animation to loop or if you want it to run once.

Set the icon and the color for the animation and tap **Done** when you're finished. Repeat the process if you'd like to add another animation.

You're All Set!

You're now set up to control your lights through the Casambi App. Thank you for choosing aspectLED for your lighting needs, please reach out to our team if you have any questions, Monday-Friday 7:30a-5:30p.

Share Your Work!

Thank you for choosing us for your project—we're thrilled to be a part of it! Share your finished projects with us on social media for an opportunity to be featured!
