

LED Strip Light Wiring Instructions

To optimize performance when running long distances, it is recommended to locate the power supply in the middle of your tapelight design.

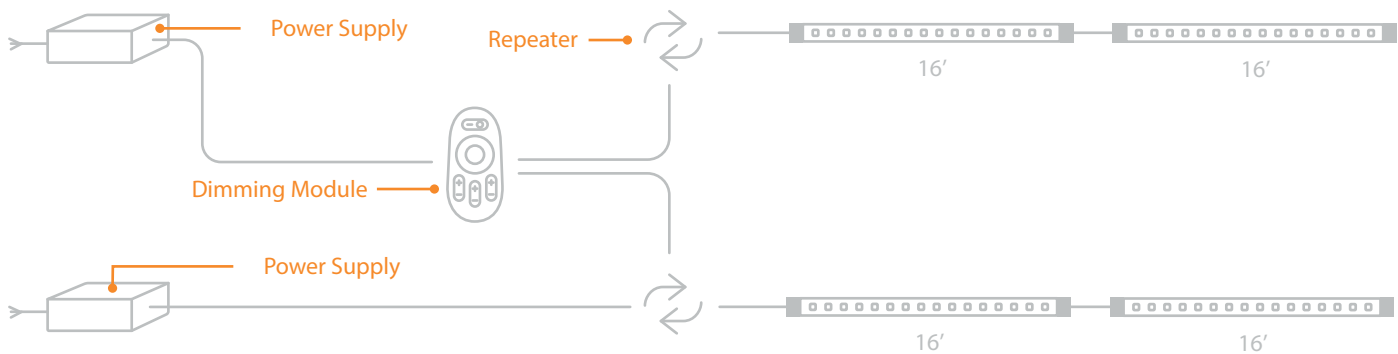

RECOMMENDED LAYOUTS

Example of two (2) 32' sections with two (2) power supplies, non-dimming

Example of two (2) 32' sections with two (2) power supplies, dimming

NOTE: Consult specifications of your product to confirm maximum run length. Do not exceed specified max run length.

Example of four (4) 12' sections with individual power supplies, dimming
